

Transforming the front office of patient care facilities

**MedicScan<sup>®</sup> OCR True Parse** is a powerful solution for scanning and retrieving information from medical insurance cards! Not only can **MedicScan<sup>®</sup> OCR True Parse** automatically extract vital information from the insurance cards, but it can place the data into appropriate fields. In addition to this, the image of the card will become interactive, allowing the user to select specific fields, parts of a field, or even multiple fields together for additional extraction.

**MedicScan<sup>®</sup> OCR True Parse** quickly and accurately captures the image of medical insurance cards from both sides\* of the card. The captured image can be attached to the patient's electronic chart, saved to a file, or exported to various applications, emailed, and sent to an FTP or web address.

**Scanner**

**MedicScan<sup>®</sup> OCR True Parse** comes with a twain compatible A6 color scanner with a resolution up to 600 DPI. The scanner connects to the computer's USB port, thus requiring no external power supply, and has small footprint.

**Ease of use**

The application is as easy as inserting the card into the scanner and MedicScan will do the rest! just insert the card into the scanner and watch how **MedicScan<sup>®</sup> OCR True Parse** does all the rest!

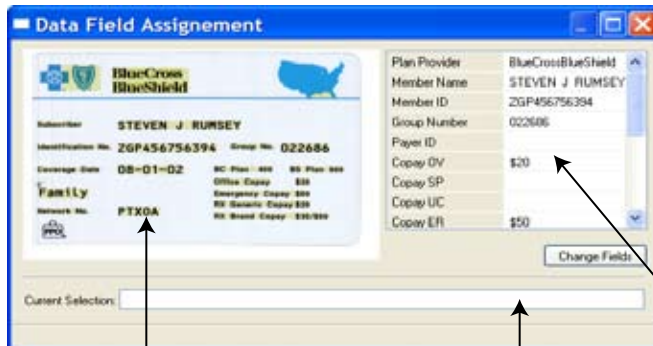

In a matter of seconds, your medical card is scanned and ready to be saved to a file, exported to various applications such as a database, MS Word and Excel, etc., as well as emailed or sent by FTP and the web..

\*In One scan or two scans, depending on the scanner.
