Scans business cards directly to ACT!

Scan2CRM for ACT! Is a fully integrated, add-on scanning system for ACT! CRM software suite. It scans business cards and automatically inputs both their textual data and image into a new contact record.

Within seconds of placing the card into the scanner, **Scan2CRM for ACT!** pulls the information off the card using OCR – Optical Character Recognition technology, and automatically populates the text fields of a new ACT! contact record (name, title, phone number, etc.), while also capturing an image file of the card.

Scan2CRM for ACT! works directly from within ACT!, making it the only business card scanning package to ACT! that does not require cards to be scanned into a 3rd party application before the information can be imported into ACT!

Just plug in the scanner, open up ACT! and the program is ready to go! Feed a card into the scanner and watch how the card is automatically detected, scanned and neatly filled in ACT!

Let Scan2CRM for ACT! save you time and money!

- Fully integrated into ACT!
- Auto-detect function
- Captures both data and image
- Only a few second per scan
- No external power needed
- Small footprint
- Fully mobile
